

Systems, Functional Data, and Methods To Pack N-Dimensional Data

Abstract of the Disclosure

- 5           Devices, systems, functional data and methods are provided for packing n-dimensional data. The navigational device with n-dimensional data packing capabilities includes a processor communicating with a memory. Packing n-dimensional data within one or more coordinate data. Each coordinate data includes n-dimensional data and a control data. The control data are operable to determine
- 10   which n-dimensional data are active within the coordinate data. Furthermore, each coordinate data are compressed or packed.
